PROFILE

Front-end developer with four years on an e-commerce subscription platform with thousands of active users. I build and maintain the CMS themes, product and checkout pages, and the landing pages behind every promo, 60+ of them so far. Most of my work is HTML/CSS layout (maquetación): turning designs into responsive templates the marketing team can reuse and launch quickly.

Before I wrote production code I spent nine years in operations and customer support. It taught me to build for the person on the other side of the screen, and to turn a vague brief into something a developer can actually ship.

EXPERIENCE

Front-End Developer, Marbill Technologies

Marbella, Spain | 06/2022 – Present

- Engineered and maintained custom themes and user interfaces for a fast-growing eCommerce subscription platform processing thousands of customer transactions monthly.
- Translated complex UI/UX designs into semantic, performant code using HTML5, CSS3, JavaScript (ES6+), Bootstrap 5, and Twig templating (similar to Shopify Liquid architecture).
- Built and shipped 60+ high-converting landing pages and promotional campaigns, collaborating closely with design and marketing teams to hit tight launch windows.
- Used AI tools like GitHub Copilot, Gemini, Claude, and ChatGPT to speed up my day-to-day development workflow (mostly for writing boilerplate, drafting test cases, and quickly refactoring logic).
- Developed front-end solutions for our corporate web projects using GitHub for clean version control and deployment organization.
- Audited and enhanced front-end web performance, systematically optimizing mobile responsiveness, core web vitals, and layout shifts to drop bounce rates.
- Acted as the core technical translator, interpreting ambiguous marketing briefs into concrete technical architecture and managing sprint cycles via Jira.

Freelance / Self-Directed Projects

Bucharest, Romania | 01/2020 – 05/2022

- Built and deployed responsive web apps with Vue 3 (Composition API, Pinia, Vue Router), Tailwind CSS and Firebase.
- Set up custom Webpack builds and fixed cross-browser styling issues.
- Completed the Udacity Front End Web Developer Nanodegree and the Zero To Mastery Vue.js Developer track.

Operations Manager, Azelis Romania

Bucharest, Romania | 02/2011 – 12/2019 · Promoted in 2012 after a year as Customer Service Specialist

- Ran the customer service and logistics team: daily operations, schedules and service quality.
- Main power user for Microsoft Dynamics AX (ERP/CRM): data updates, fixing system issues and training new staff.
- Tracked sales metrics and inventory forecasts with the Country Manager and delivered weekly operational updates.
- Fixed broken workflows and kept internal teams and external partners aligned when requirements changed.

SKILLS

- **Front-end:** HTML5, CSS3, Tailwind CSS, Bootstrap 5, JavaScript (ES6+), Twig, Vue 3, responsive design, HTML email
- **CMS & e-commerce:** theme development, reusable sections, landing pages, product, cart and checkout pages, multi-language sites
- **UX & quality:** usability, accessibility, Core Web Vitals, semantic HTML, technical SEO
- **Tools:** Git/GitHub, Figma, Webpack, Firebase, Jest, Jira, ClickUp, AI coding assistants (GitHub Copilot, Claude)
- **Languages:** Romanian (native), Spanish (C2), English (C1), German (basic)
