PROFILE

Front-end developer with four years building storefront themes, landing pages and checkouts for an e-commerce subscription platform, currently in a team of four front-end developers. Before switching to code I spent nearly ten years in operations and customer support, so I build with the person using the page in mind, not just the code.

EXPERIENCE

Front-End Developer, Marbill Technologies

Marbella, Spain | 06/2022 – Present

- Developed and maintained 10+ custom storefront themes for a growing e-commerce subscription platform with a high volume of monthly orders.
- Turned Figma designs into clean, fast-loading pages with HTML, CSS, JavaScript, Bootstrap 5 and Twig (a templating language similar to Shopify's Liquid).
- Built Twig templates on top of a PHP back end, and debugged template and data issues with the back-end team.
- Shipped 100+ landing pages and promo campaigns with design and marketing, often on tight deadlines.
- Built the product, cart, checkout and subscription pages, plus the order and shipping emails, making them easier to use on mobile and quicker to buy from.
- Improved page speed and mobile layouts: lighter images, fewer layout shifts and better Core Web Vitals scores.
- Created small JavaScript tools that help the content team translate and check pages in bulk.

Freelance / Self-Directed Projects

Bucharest, Romania | 01/2020 – 05/2022

- Built and deployed responsive web apps with Vue 3 (Composition API, Pinia), Tailwind CSS and Firebase.
- Set up custom Webpack builds and fixed cross-browser styling issues.

Operations Manager, Azelis Romania

Bucharest, Romania | 02/2011 – 12/2019 · Promoted in 2012 after a year as Customer Service Specialist

- Led the customer service team: planned the work, set priorities and handled issues as they came up, much like sprints today.
- Main power user for Microsoft Dynamics AX (ERP/CRM): helped roll out a system upgrade, tested the new workflows, wrote the process documentation and trained colleagues.

SKILLS

- **Front-end:** HTML5, CSS3, Tailwind CSS, Bootstrap 5, JavaScript (ES6+), Twig (PHP templating, Liquid-style), Vue 3, responsive design, HTML email
- **CMS & e-commerce:** theme development, reusable sections, landing pages, product, cart and checkout pages, multi-language sites
- **UX & quality:** usability, accessibility, Core Web Vitals, semantic HTML, technical SEO
- **Tools:** Git/GitHub, Figma, Webpack, Firebase, Jest, Jira, ClickUp, AI coding assistants (GitHub Copilot, Claude, Gemini, ChatGPT)
